Information Technology
Cutting-edge Courses

Keeping pace with the dynamic field of information technology requires constant learning. With over 150 cutting-edge courses in classrooms across the state and over 500 through the online eLearning Network, the Department of Personnel provides the training you need to succeed. Whether seeking new technology-related skills or steadily developing your career potential, the Department of Personnel is your one-stop learning solution.

We work closely with public sector technical training firms and community college IT course instructors to anticipate your information technology training needs. New courses and sessions are added regularly so you can be confident that the training is up-to-date and relevant. Take advantage of our broad curriculum including courses in:

IT Project Management

Client Server and Mainframe

Web Development

Programming Languages

Databases

Networks

Skill Refreshers and Career Development

Choose from our wide array of technology courses, paths to certification, and long-term IT career development.
